

Declaration Letter

Sunday 21th February 2021

To Whomsoever It May Concern

COVID-19 Antigen Test kit (Dry Fluorescence Immunoassay) manufactured by Lansion Biotechnology Co., Ltd. Company detects nucleocapside proteins on the surface of the SARS-CoV-2 virus. As the mutations in the new variants appearing in UK are happening in the S-1 spike protein, they do not effect our sensitivity, specificity and total accuracy.

Therefore, we state that we can detect the new variants of the virus successfully with our COVID-19 Antigen Test kit (Dry Fluorescence Immunoassay)

For your information.
